

**NOW HIRING!**

**NOW HIRING!**

### The Company

C & C Technologies, the undisputed worldwide leader in deepwater autonomous underwater vehicle (AUV) operations, is now hiring technical personnel to support its AUV operations, as well as other high technology operations.

C & C Technologies is based in Lafayette, Louisiana and employs over 400 people with offices in Houston, Texas; Ciudad del Carmen, Mexico; Rio de Janeiro, Brazil; Luanda, Angola; London, United Kingdom; Cape Town, South Africa and Singapore. In addition to AUV projects, C & C Technologies is a leader in multibeam bathymetry surveys, marine construction surveys, and in the application of high accuracy GPS technology to land and marine surveys.

C & C provides survey services to the oil and gas industry, engineering firms, and government entities. The company's fleet of AUVs are equipped with state-of-the-art remote sensors capable of providing detailed information about the ocean bottom to depths of 4,500 meters. C & C's AUV program has revolutionized the way the deepwater surveys are performed.

### C & C AUVs

The C & C AUV fleet has collected data over more than 44,750 miles of ocean bottom offshore of 11 countries for 46 unique and varied clients. Although most of the work is for the oil and gas industry, C & C has also performed surveys for the Minerals Management Service, the NOAA Office of Ocean Exploration, and for several universities.

C & C's AUVs, powered by fuel cells, operate for up to 60 hours at 3.7 knots. Navigation includes DVL, acoustic (USBL), DGPS, inertial, and other techniques. The sensor suite includes a multibeam echosounder, a dual frequency side scan sonar, a subbottom profiler, and a CTD. Data is stored on the AUV and decimated data is transmitted acoustically to the ship in real time.

### Employees

One of the most important characteristics of C & C employees is a positive, can-do attitude. This includes getting along with co-workers, responding politely to clients, working as a team member, functioning well under pressure and responding in a positive manner to supervision.

### Positions Available

C & C is currently looking for surveyors to work on land as well as offshore on hydrographic and geophysical survey vessels. We also have positions available for Data Analysts, Offshore Draftspersons, AUV Technical Specialists, Electrical Engineers and Geophysicists. If you would like more information or are interested in a career with us, please contact us with your resume.
